CareyTown Educational Summer Program

Here at CareyTown, we provide an educational summer program for students in K – 5th grade, which takes place during the first week of June through the second week of August, each year (dates may vary). The summer program helps to expand access to creative/unique learning experiences, which includes field trips, interactive tools/materials, presentations, and guest speakers, in order to promote educational supplementation and student support during the summer months. Our program utilizes various modalities of learning, such as:

1. Implementing activities with an emphasis on Science, Technology, Engineering, Arts, Math (STEAM) learning objectives.
2. Providing social and emotional intervention and educational services, where students are able to learn, practice, employ, and maintain positive emotions-management skills, appropriate. conflict management techniques, and healthy thinking patterns.
3. Learning, growing, and developing fundamental reading and comprehension skills
4. Practicing basic principles of citizenship to facilitate positive communication, empathy, and understanding the importance of servicing the community around them.
